

### About Bio-ITech BV

Bio-ITech provides information management solutions for life science laboratories. Our products meet and exceed standards in the biotech industry, while maintaining portability and flexibility for academic labs. Based on years of experience and intelligent design, eLabJournal will take your lab to the next step it needs.

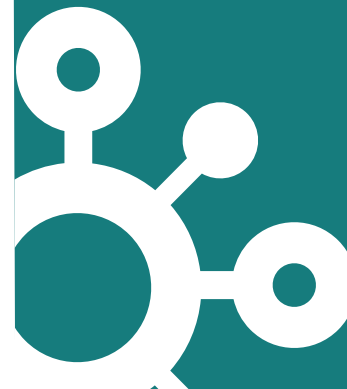

Bio-ITech offers additional services for customization and development of tailor-made applications. We provide turn-key solutions for which you will appreciate the creative and highly skilled effort that is part of all our software.

**Simplifying**  
Laboratory Information Management

## Technology at work for you

### Efficient Data Management

Organize projects, studies and collect experimental data efficiently. eLabJournal seamlessly integrates in any laboratory workflow. We offer a single architecture platform for study management, resource planning, tracking sample audit trails, SOP implementation, standardized data collection, management and archiving.

eLabJournal has intuitive graphical user interface and is easy-to-use.

### Increased Productivity

Compared to classic methods or other LIMS solutions, eLabJournal stands out in saving a significant amount of time when logging experiment data. In addition, eLabJournal allows you to find back any data within seconds. Increase productivity up to 30% by letting eLabJournal facilitate an efficiently organized workflow.

# Flexible Solutions for any Laboratory Needs

### Features and Benefits

- Project Management
- Workflow-based Study Configuration
- Experiment and Resource Planning
- Dynamic Procedure Templates
- Inventory Management
- Data Output Analysis and Storage
- Reporting and QA
- User Roles and Permissions
- Intuitive User Interface
- GLP compliant 21 CFR part 11
- Competitive Prices

### Inventory Management

Manage the full laboratory inventory, including specimen, samples and chemicals, with the included *Inventory module*. The inventory offers an intuitive representation of the various storage facilities in laboratories. All items organized in the inventory module are track- and traceable and receive a full GLP compliant audit trail.

The Inventory module supports sample barcode labelling that allows you to read out information including its history of any material, but also for automated high throughput sample processing and for use in blind studies.

### Turn-Key Solution

eLabJournal offers a turn-key solution to laboratories. We provide implementation support, application hosting, data warehousing, application maintenance, automated backups and helpdesk support. These solutions are offered both as a remote service in our fully redundant datacenter, or locally within your own premises.

eLabJournal is offered for a competitive price and is suitable for both industry and academia. For more information or to request a demonstration, please do not hesitate to contact us.

### Most Flexible LIMS in the market

eLabJournal does not depend on ICT investments to customize the software before implementation. Instead, eLabJournal has been created to be flexible and adaptable to any situation. eLabJournal thus offers a tailored solution to laboratories for an affordable price.

### Control Center

The eLabJournal *Control Center* provides a comprehensive birds-eye-view of the progress of all current projects and studies.

Signal real-time delays, bottlenecks or blocks and take immediate action to ensure high efficiency and maximized productivity,

### GLP compliant, 21 CFR part 11 Certified GAMP5

If applicable, eLabJournal can operate in full GLP compliance mode, including 21 CFR part 11.

In addition we have certified GAMP5 validators that can audit and improve your laboratories workflow.
